

The start

This is my first blog, so please nothing classy or anything that is high quality.

Since this is my first blog ever, I'll just talk about something. This page I made with the technologies HTML 5, CSS 3 and Bootstrap v 5.0. The Bootstrap is mainly used for the class row and all col classes, da ich mit denen viel einfacher die seite gestalten kann. Natürlich hat Bootstrap auch noch ein bisschen Javascript, welches zum teil aus der JQuery library besteht, aber ich benutzte es nicht.

because I can design the page much easier with them. Of course Bootstrap also has a bit of javascript, which is partly from the JQuery library, but I don't use it.
